What we will do:

- Develop the network of local high-quality, connected and sustainable community spaces including the new Glencoyne hub.
- Invest in our centres to support community and nature, improve accessibility, and reduce our carbon footprint.
- Provide flexible space in our hubs for local businesses and the services that people need.
- Expand the groups, activities and services across our centres, including our affordable gym and opportunities for young people.
- Improve access and safety through community transport, a sustainable travel plan and a redesigned car park at Greenway.
- Create a new outdoor wellbeing space at Greenway and further utilise existing spaces to foster and sustain community relationships with nature and biodiversity.
- Support and advocate for improved facilities across the area such as a new library, sports facilities and community allotments.
