What we will do:

- Run a vibrant and growing programme of events to celebrate Southmead, build connections across different backgrounds and ages, welcome new communities, and bring people together through culture and heritage.
- Deliver the Community Climate Action Plan, and work with partners and residents to develop further shared plans that guide local priorities and decision-making.
- Support community voice and influence, networking and co-production of projects and services through regular community forums and ‘Let’s Talk about’ event conversations, with themed workshops or events on topics such as community safety.
- Progress community-led regeneration on Arnside to improve facilities, open spaces, and access to affordable, diverse housing. Complete the Glencoyne Housing Project to extend the high street and bring homes into community ownership.
